ARTIFICIAL INTELLIGENCE SERVING HEART RHYTHM

Job offer

US CLINICAL & TECHNICAL SUPPORT SPECIALIST

Volta Medical is an **innovative start-up** in the south of France, aimed at creating and bringing to the market AI software products to help cardiologists during heart surgeries.

We are a team of **world-known cardiologists, data scientist and managers from France and US** working in a great environment in order **to make difference on the health market**. Our main product is a therapeutic solution using data-driven approach for treating AF based on intracardiac signals' analysis. This solution builds on **artificial intelligence** approaches to gain insight into **innovative therapies for AF**.

In fact, this represents one of the **first fully AI-guided successful surgical procedures, serving as a revolutionary step in the field of AI**.

Our technology has been granted the "Seal of excellence" by European commission, as well as appraised by research institutions, regional authorities and journals, such as "Les Echos" and "La Provence". We have recently raised 2.3 million and our team is rapidly growing, with 5 new employees joining us in December.

Our start-up has been mentioned in DICardiology, MedTech Insight, as well as in numerous French journals.

Mission

With the CSO (based in the US) and COO (based in Paris), the US Clinical & Technical Support Specialist will successfully deploy the software for clinical trials and commercialization in the American centers. The mission is both commercial - to access hospitals in the US in order to install the software and invoice it and technical - to manage the technical problems in the operating room, optimize the fluid use of the VOLTA software, support the clinical cases and list the problems encountered (computer bugs ...), help centers solve the technical problems.

The position will be the link between the European deployment team and the US market. His central role will make him an employee with very high visibility, responsibility and growth opportunities. The Clinical & Technical Support Specialist will be the ambassador of the brand in the US.

Growth opportunity within the company: management responsibilities when new US Clinical & Technical Support Specialist will be hired (approx. 2020).

Frequent travel within the US and eventual travel to Europe is expected, as well as 1-2 months of training in the head office in France.
